

## **MASTER OF SCIENCE IN NATURAL RESOURCE MANAGEMENT**

**The MS NRM provides working professionals the opportunity to gain advanced knowledge and deepen their understanding of natural resource topics by providing primarily at-distance courses. Courses are delivered synchronously and asynchronously, allowing graduate students the flexibility to complete coursework and continue working with their current employer.**

**This multidisciplinary Graduate Program allows students to gain and expand their knowledge in:**

- **Forestry/Fire Management**
- **Wildlife/Fisheries Management**
- **Hydrology Management**

**Graduate students will develop the necessary skills to complete research-based projects and assignments to propel themselves in their professional problems.**

### **Learning outcomes:**

- **Scientific Knowledge**
- **Research Skills**
- **Professional Competencies**
- **Cultural and Indigenous Background**
